Portfolio: rachithaeshan.vercel.app

PROFESSIONAL SUMMARY

Software Engineering undergraduate with hands-on experience developing full-stack web applications using Java, Spring Boot, React, Next.js, Angular, and PostgreSQL. Skilled in REST API development, JWT authentication, relational database design, and modern software engineering practices. Passionate about building scalable applications and seeking a Software Engineering or Full-Stack Developer Internship to contribute to real-world projects while expanding technical expertise.

EDUCATION

- **Sri Lanka Institute of Information Technology (SLIIT) – Specializing in Software Engineering** | *Malabe, Colombo, Sri Lanka*
- **Expected Graduation: 2027**
- **G.C.E. Advanced Level – C.W.W. Kannangara Central College** | *Matugama, Sri Lanka*
- **Engineering Technology: C | Science for Technology: C | ICT: C**
- **G.C.E Ordinary Level (2017):** A-3, B-1, C-5 passes

TECHNICAL SKILLS

Programming Languages:

Python, C/C++, C#, JavaScript, TypeScript, PHP, Java

Frontend:

HTML, CSS, SCSS, Tailwind CSS, React, Next.js, Angular

Backend:

Node.js, Express.js, Spring Boot, REST APIs, JWT Authentication

Development Tools:

VS Code, Postman, RStudio, Eclipse, Dev-C++, Selenium, Cisco Packet Tracer, IDLE (Python), IntelliJ IDEA, Vercel, Render, Docker, Git, GitHub

Database:

MySQL, MongoDB, PostgreSQL

Core Competence:

Agile Development, Problem Solving, Communication, Team Collaboration, Willingness to Learn

ACADEMIC PROJECTS

TeamFlow – AI-Powered Project & Team Task Management Platform | *Solo Project*

Tech Stack: Next.js, Node.js, Express.js, TypeScript, PostgreSQL, Prisma ORM, JWT, Tailwind CSS, Google Gemini AI

- Developed a full-stack project and task management platform with **Admin, Project Manager, and Team Member** role-based access control.
- Built **30+ RESTful APIs** for authentication, project management, task tracking, notifications, and analytics.
- Integrated **Google Gemini AI** to generate project summaries and provide an intelligent project assistant.
- Designed a relational PostgreSQL database using **Prisma ORM** and implemented secure JWT authentication.
- Deployed the application using **Vercel (Frontend), Render (Backend), Neon PostgreSQL**, with GitHub Actions for CI/CD.
- **GitHub:** <https://github.com/rachithaeshan/TeamFlow>

TeamPulse – AI-Powered Meeting & Team Collaboration Platform | Solo Project

Tech Stack Spring Boot, Java, Next.js, PostgreSQL, Hibernate, Spring Data JPA, JWT, Google Gemini AI

- Developed a full-stack team collaboration platform with secure authentication and role-based access control.
- Designed and implemented **RESTful APIs** for meeting management, user management, reports, and collaboration features.
- Integrated **Google Gemini AI** to generate meeting summaries, reports, and provide an AI-powered chat assistant.
- Designed a relational PostgreSQL database using **Hibernate** and **Spring Data JPA** with optimized entity relationships.
- Deployed the application using modern cloud services with Git-based version control.
- **GitHub:** <https://github.com/rachithaeshan/TeamPulse>

InternLink - Internship & Placement Portal | Solo Project

- Java Spring Boot, Next.js, PostgreSQL
- Designed and implemented 20+ RESTful APIs for authentication, internship management, application tracking, and user administration.
- Developed a PostgreSQL database with 5 relational entities using Spring Data JPA and Hibernate ORM.
- Implemented secure resume uploads, profile image management, Excel report generation, and real-time administrative analytics.
- GitHub - <https://github.com/rachithaeshan/internLink.git>

Finance Tracking & Budget Management System | Solo Project

- Developed a full-stack personal finance management web application using Angular, Spring Boot, PostgreSQL and Maven.
- Integrated authentication and authorization using JWT security.
- Built modules for Transaction management, Budget tracking, Category management, and Admin dashboard.
- Developed and integrated REST APIs to enable secure communication between Angular frontend and Spring Boot backend services.
- GitHub - <https://github.com/rachithaeshan/FinTrack>

Building an AI-Enabled Smart Healthcare Appointment & Telemedicine Platform using Microservices | Group Project

- Developed a web application using MERN.
- Designed notification service using Twilio and Google.
- Applied telemedicine service using Agora.
- GitHub - [rachithaeshan/CareLink: CareLink: Cloud-Native Healthcare Platform with Patient/Doctor Management, Video Consultations, Payments, and AI-Based Symptom Checker](#)

Online Hospital Employee management System | Group Project

- Developed a web application using MERN.
- Automated role-based authentication and authorization features for employee account management.
- GitHub - [rachithaeshan/WorkPulse: Hospital Employee Management System](#)

A web app for illegal fishing reporter with species database System | Group Project

- Developed a web application using MERN.
- Created login and sign up, create roles and assign etc.
- GitHub - [rachithaeshan/AquaShield: AquaShield is a group academic project designed to monitor illegal fishing activities, manage protected marine species, and streamline case handling using modern web technologies.](#)

Mobile Applications | Solo Projects

- Produced a UI & UX for Meal suggestion app and displaying calorie information based on available groceries using Kotlin.
- Developed Health Monitoring mobile app (Wellora) using Kotlin and SQLite.
- GitHub - [rachithaeshan/Wellora](#)

Online voting system | Group Project

- Developed a web-based voting system using HTML, CSS, PHP and SQL.
- Implemented login, Admin Dashboard, and user management.

Online computer spare parts | Group Project

- Developed a web-based system using Java Servlets, JSP, and SQL.

- Payment, Payment confirmation, and Orders.

Software Testing

- Automated web testing using **Playwright**(**TypeScript**) with real-world scenarios

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Higher Diploma in Information Technology at SLIIT.
- Completed Oracle **Java Foundation Course**.
- Completed C# and .NET Essential Training.
- Completed Introduction to AI in Netcad.
- Completed Introduction to Kubernetes.
- PostgreSQL: Become an SQL Developer
- Basics and Structure of Java Programming in Alison
- Python for Beginners - University of Moratuwa
